To whom it may concern

Re: Water audit experts H2O Building Services.

We commissioned H2O Building Services to help us reduce our water and waste water charges, providing water consultancy expertise. They installed AMR water flow data logging equipment providing crucial water flow data especially for monitoring high overnight usage indicating underground water leaks.

They then completed water leak detection across our entire underground water network and pinpointed 2 water leaks for repair, saving a significant amount of water and reducing our water and waste water bills. In addition they have negotiated significant refunds on our water bills due to overcharging.

We have been more than impressed with their performance and water industry expertise and would not hesitate to recommend them.

Yours faithfully
